## Education

**Smt. Indira Gandhi College Of Engineering**

**2023 – 2027**

*Bachelor of Engineering in Computer Engineering, CGPA:8.98*

*Ghansoli, Navi Mumbai*

## Relevant Coursework

- Data Structures
- Object Oriented Programming
- Artificial Intelligence
- Database Management System
- Operating Systems

## Experience

**Sapphire Infocom Pvt. LTD**

**Remote**

*Software Development Intern*

*August 2025 – November 2025*

- Developed **Sentra**, an incident reporting and response platform for educational institutions.
- Developed a full-stack incident reporting platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented secure user authentication and role-based access for students, staff and admin.
- Designed a responsive frontend using React and integrated REST APIs for backend communication.
- Enabled users to report incidents, track their status, and access safety resources.
- Collaborated with a development team during a remote internship to design and implement application features.

## Projects

**Sentra – Incident Reporting System | MERN Stack**

- Developed a web application for reporting and managing incidents within educational institutions.
- Implemented secure user authentication and incident tracking using MongoDB and Express.js.
- Implemented role-based access control for students, staff and administrators.
- Designed responsive frontend using React and REST API integration.

**Virtual Banking System | Java, MySQL**

- Developed a banking management system using Java and MySQL to simulate core banking operations.
- Implemented functionalities such as account creation, deposit, withdrawal, balance inquiry, and transaction history.
- Used object-oriented programming concepts including classes, inheritance, and encapsulation for modular design.
- Integrated MySQL database to securely store customer and transaction data.

**SkillMatch – ATS Resume Analyzer | Python, Machine Learning, HTML, CSS**

- Developed a resume analysis system that evaluates resumes against job descriptions to generate an ATS compatibility score.
- Implemented Natural Language Processing (NLP) techniques to extract keywords and skills from resume and job description PDFs.
- Identified missing skills and important keywords to help candidates improve resume optimization for applicant tracking systems.
- Implemented bulk resume upload and ranking functionality to identify the best matching resume for a job description.

## Technical Skills

**Programming Languages:** Java, Python, C, JavaScript

**Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Express.js

**Machine Learning:** Machine Learning, Natural Language Processing (NLP)

**Databases:** MySQL, MongoDB

**Tools:** Git, GitHub, VS Code

**Concepts:** Object-Oriented Programming, REST APIs, Responsive Web Design

## Leadership / Extracurricular Activities

- **Top 10 – GenAI Hackathon 2025 (AI Mumbai)** – Ranked among the Top 10 teams in a Generative AI hackathon, developing an AI-based solution under a limited time frame through collaborative problem solving.
- **Content Creator – Computer Engineering Department Media Team, SIGCE** – Contribute to creating technical magazines and newsletters for the Computer Engineering Department and assist in promoting departmental events and initiatives.
